DETAILED ACTION

Allowable Subject Matter

Claims 7-18 are allowable. The following is an examiner's statement of reasons for allowance: With respect to claim 7, the Prior Art does not teach a digital to analog oversampling converter, which outputs a bitstream analog signal, and the microcontroller receives a commanding digital signal from a commanding source and a feedback digital signal from said digital output of said detecting device and processes the digital data to drive said motor actuator in response to the signal to drive the motor and control physical parameter (position, velocity, acceleration). With respect to claim 13, the Prior Art does not teach producing an oversampled bitstream analog signal which drive the motor and controls physical parameters (position, velocity, acceleration, pressure) of the servo motor, and the dynamic range of the servo loop is increased by noise shaping of the oversampled bitstream analog signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erick Glass whose telephone number is 571-272-8395. The examiner can normally be reached on 8-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
